Equitone Cladding is a premium quality fibre cement cladding material, specially designed to make the façade of modern buildings strong and attractive. In today's time, people not only want strength of walls but also want style, durability and safety. Keeping these needs in mind, Equitone cladding has become the first choice of architects and builders.

What is Equitone?

Equitone cladding is a solution prepared from a mixture of cement, cellulose fibres and minerals. It is designed in such a way that it is lightweight as well as strong. This is the reason why these panels easily withstand every weather like rain, sun, humidity and cold.

Why choose Equitone cladding?

1.Durability
Equitone panels last for decades and do not require frequent repairs.

2.Weather Resistant
Be it sun, rain or humidity – these panels retain their color and strength for a long time.

3.Low Maintenance
No hassle of frequent painting or cleaning. Equitone automatically looks like new.

4.Stylish and Modern Look
Various design, texture and color options are available. Architects prefer it for creative designs.

5.Fire Resistant
Due to fiber cement, it does not catch fire easily and makes the building safe.

Eco-Friendly and Sustainable
It is a 100% recyclable material, which does not cause any harm to the environment.

Types of Equitone

Equitone does not come in just one style, but many variants are available:

1.Equitone Tectiva – Natural cement look and unique texture.

2.Equitone Natura – Transparent coating with natural texture.

3.Equitone Line – Linear pattern and modern design.

4.Equitone Pictura – Smooth finish and premium high-gloss look.

Where is Equitone used?

Commercial buildings – Offices, schools, hospitals, shopping complexes.

Residential projects – Homes, apartments and villas.

Public spaces – Government buildings, railway stations and cultural centres.

Popularity of Equitone in UK

UK weather is often changing – rain, cold and humidity affect the walls. In such a situation, Equitone panels provide strong protection and stylish look to the buildings.
